

# Adobe XD Material Design Kit

The Adobe XD Material Design Kit includes helpful elements such as cards, buttons and other components for creating Material Design apps. Customize your design by quickly modifying colors, character styles and symbols using the Assets panel within Adobe XD.

Visit <https://material.io/> for Material Design resources, guidance and more.

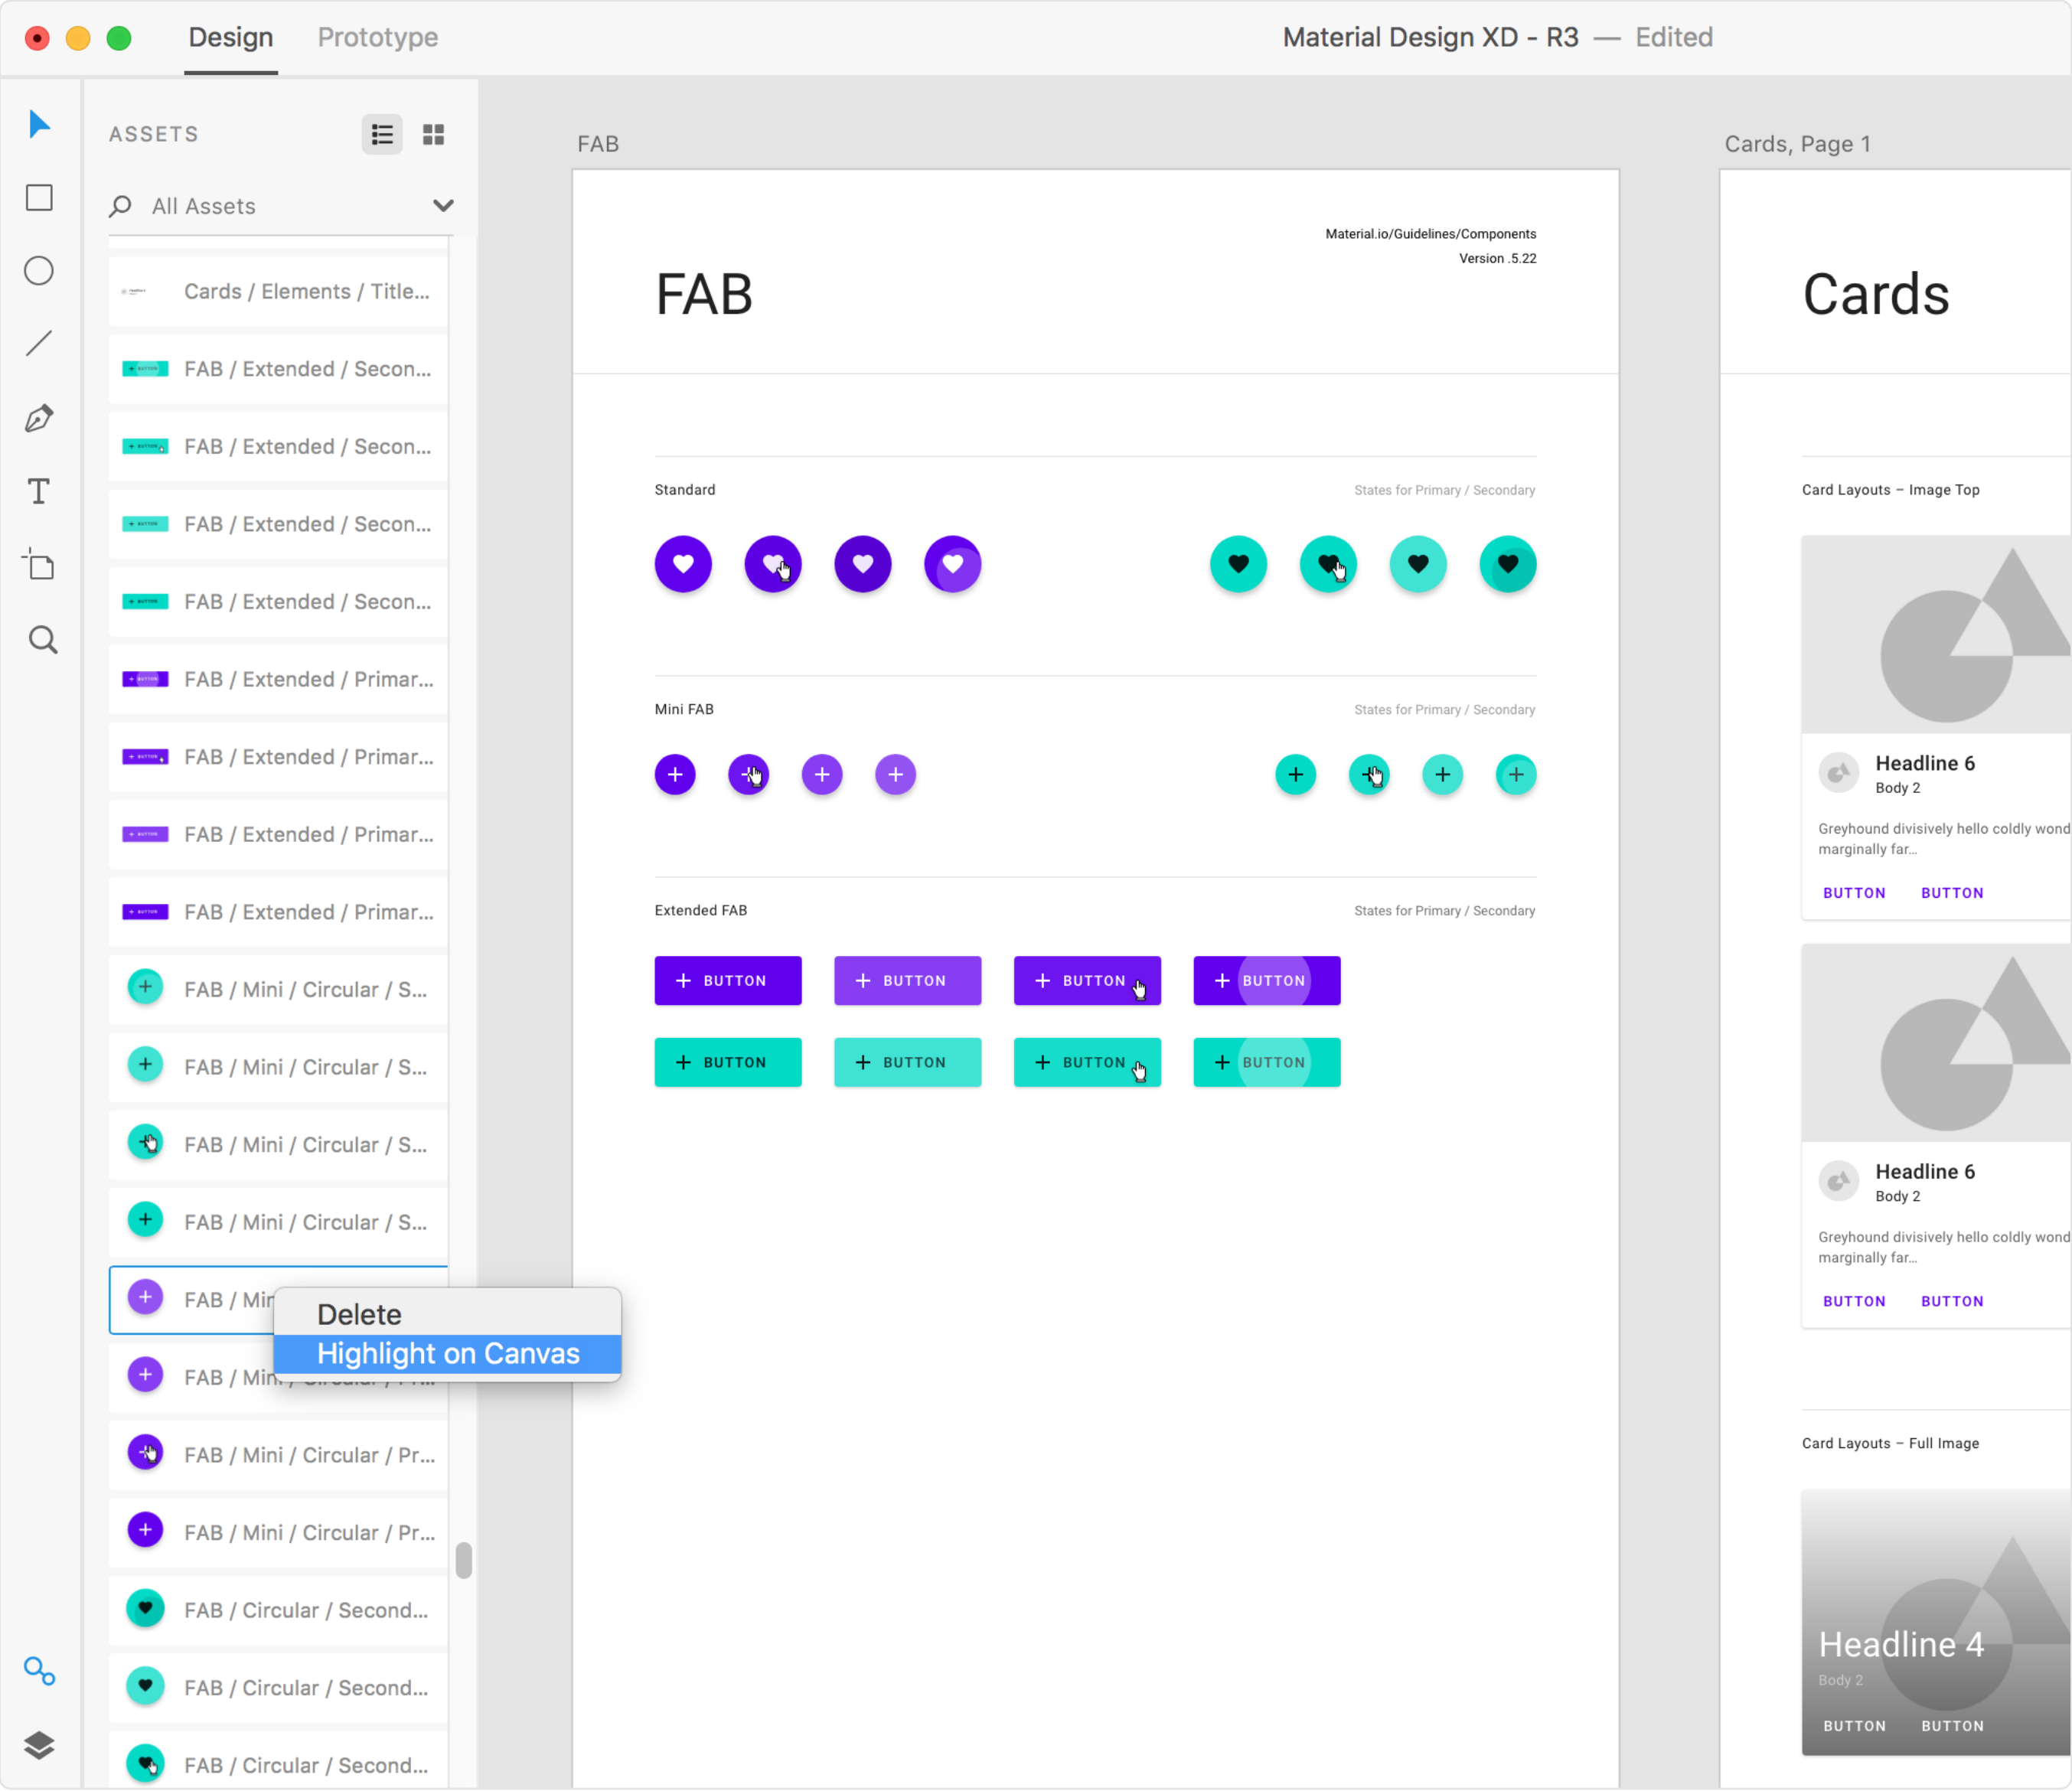

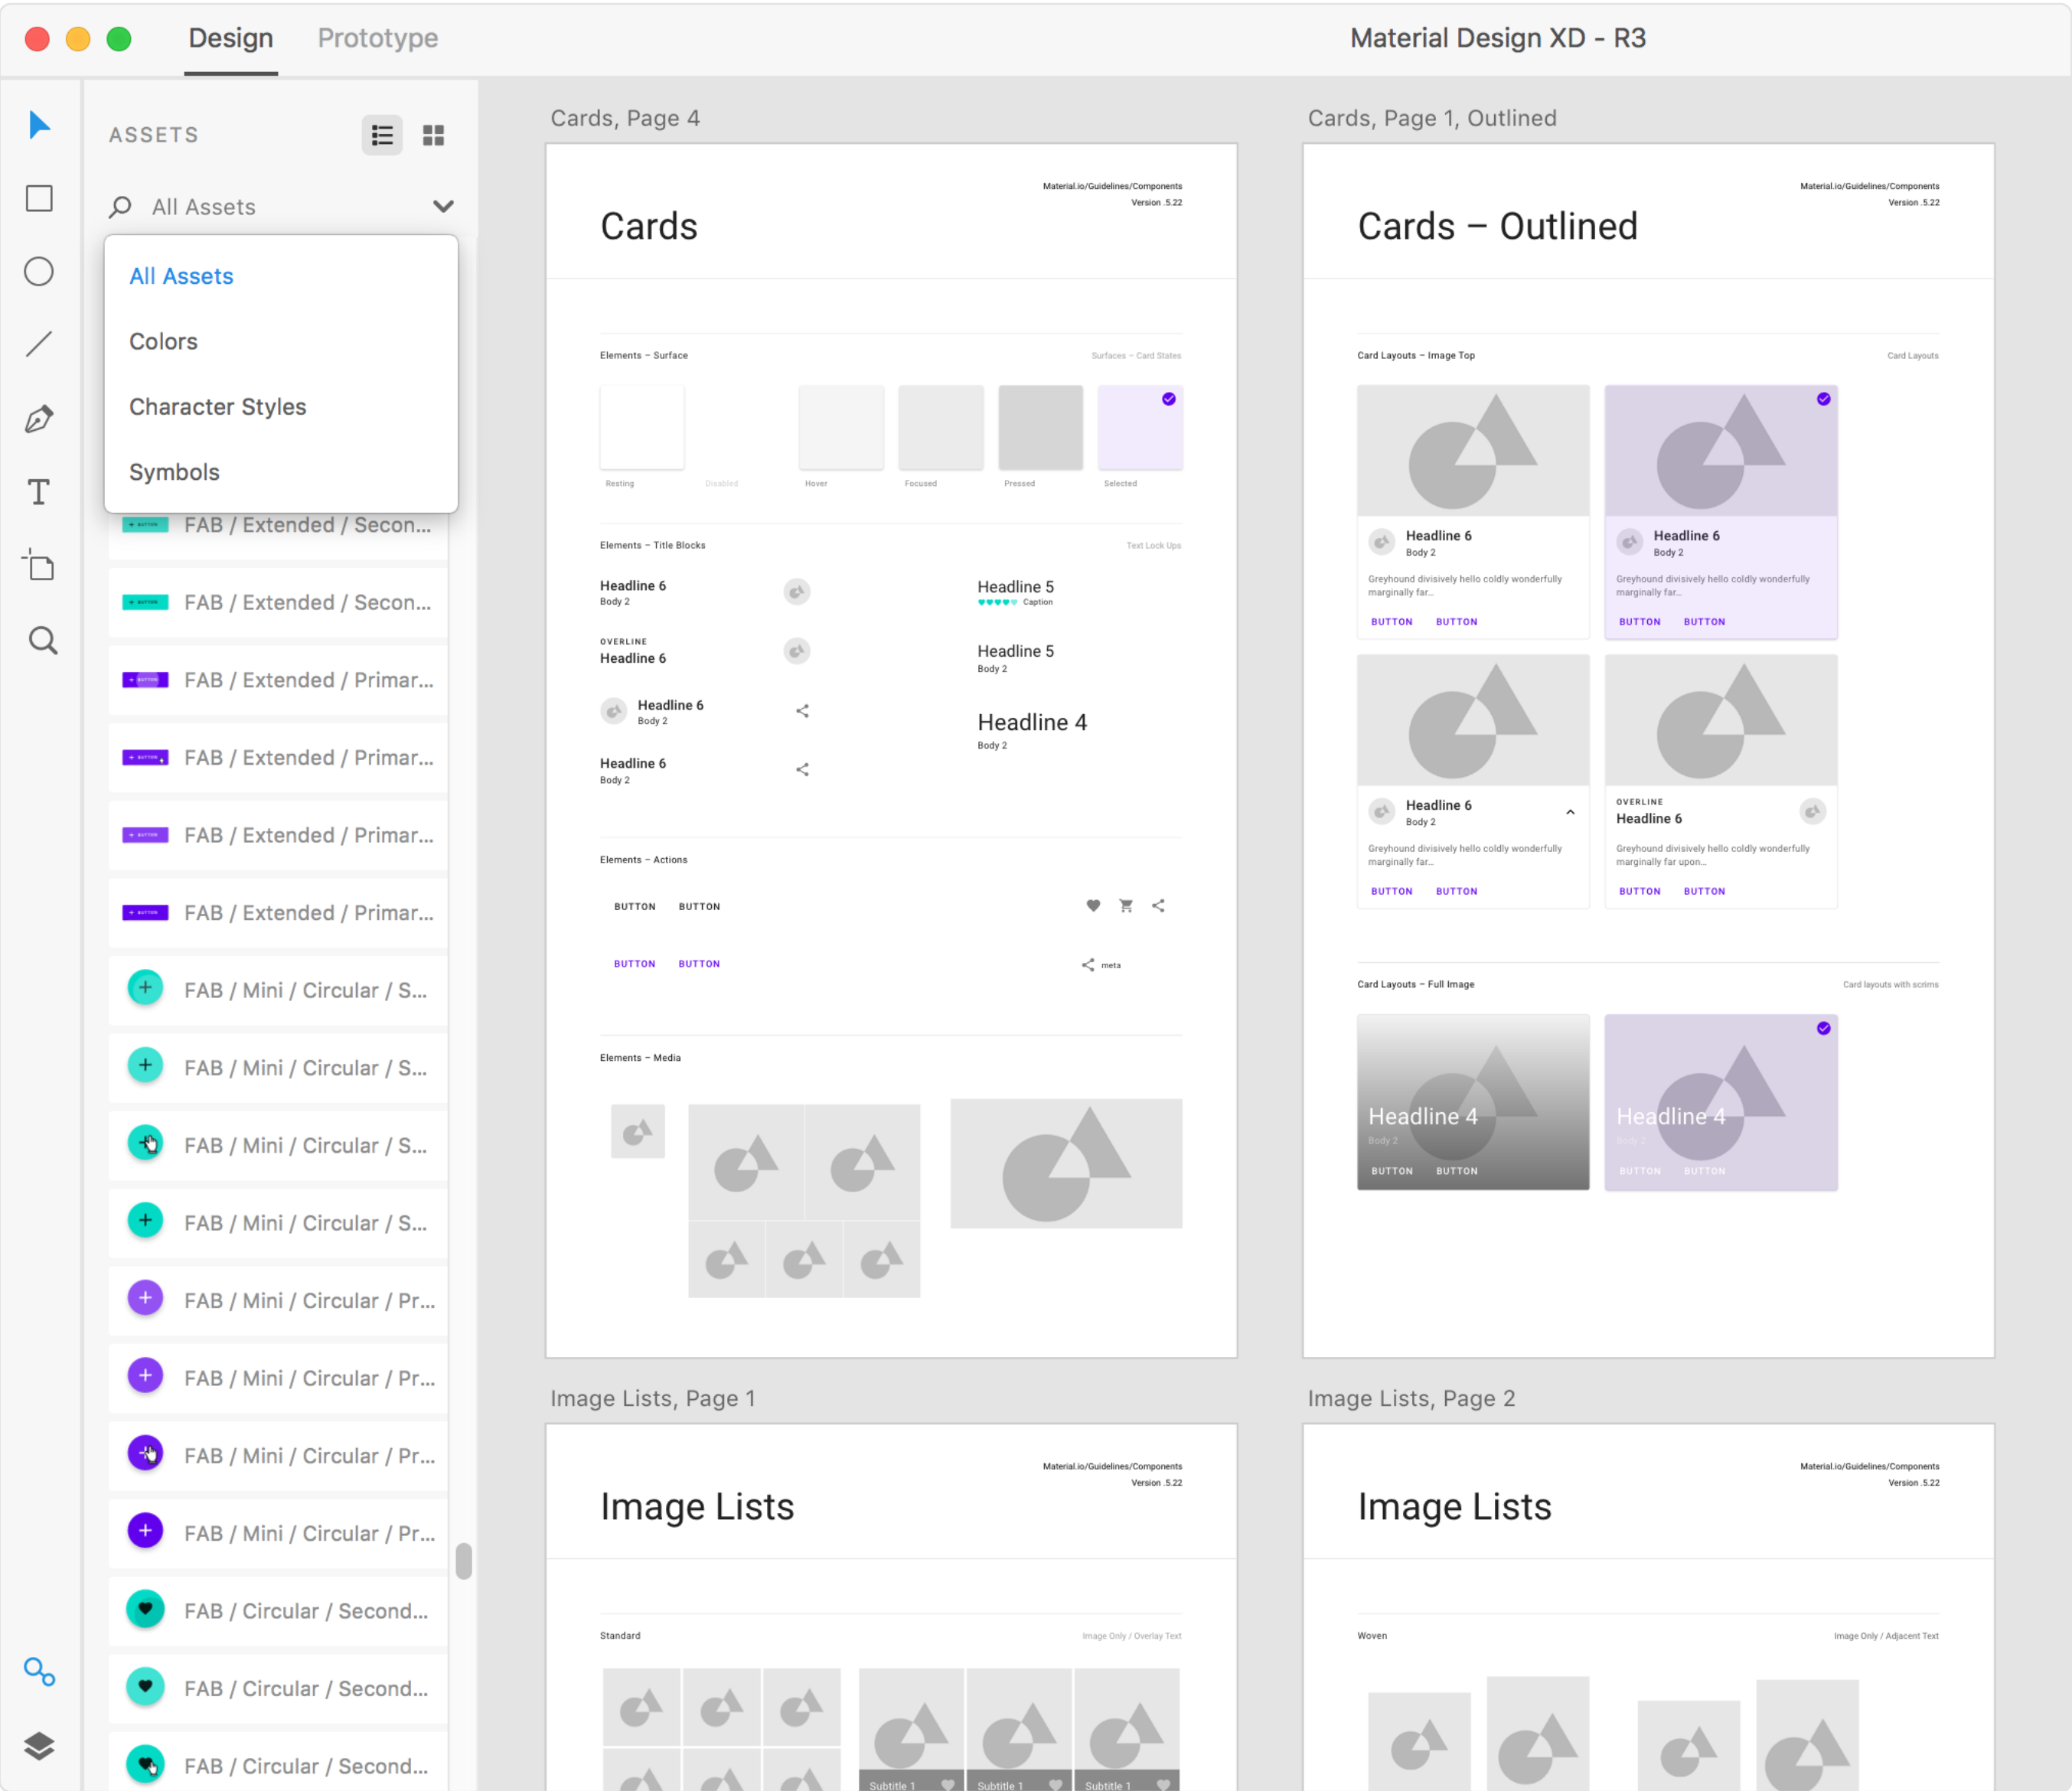

Discover more of Adobe XD's features in the sample file available from the Help menu > XD tutorial in the app.

## Using the Assets Panel in Adobe XD

Use the Assets Panel to reuse symbols, change colors and fonts. Changes made in the AssetsPanel will be reflected in all the relevant artboards.

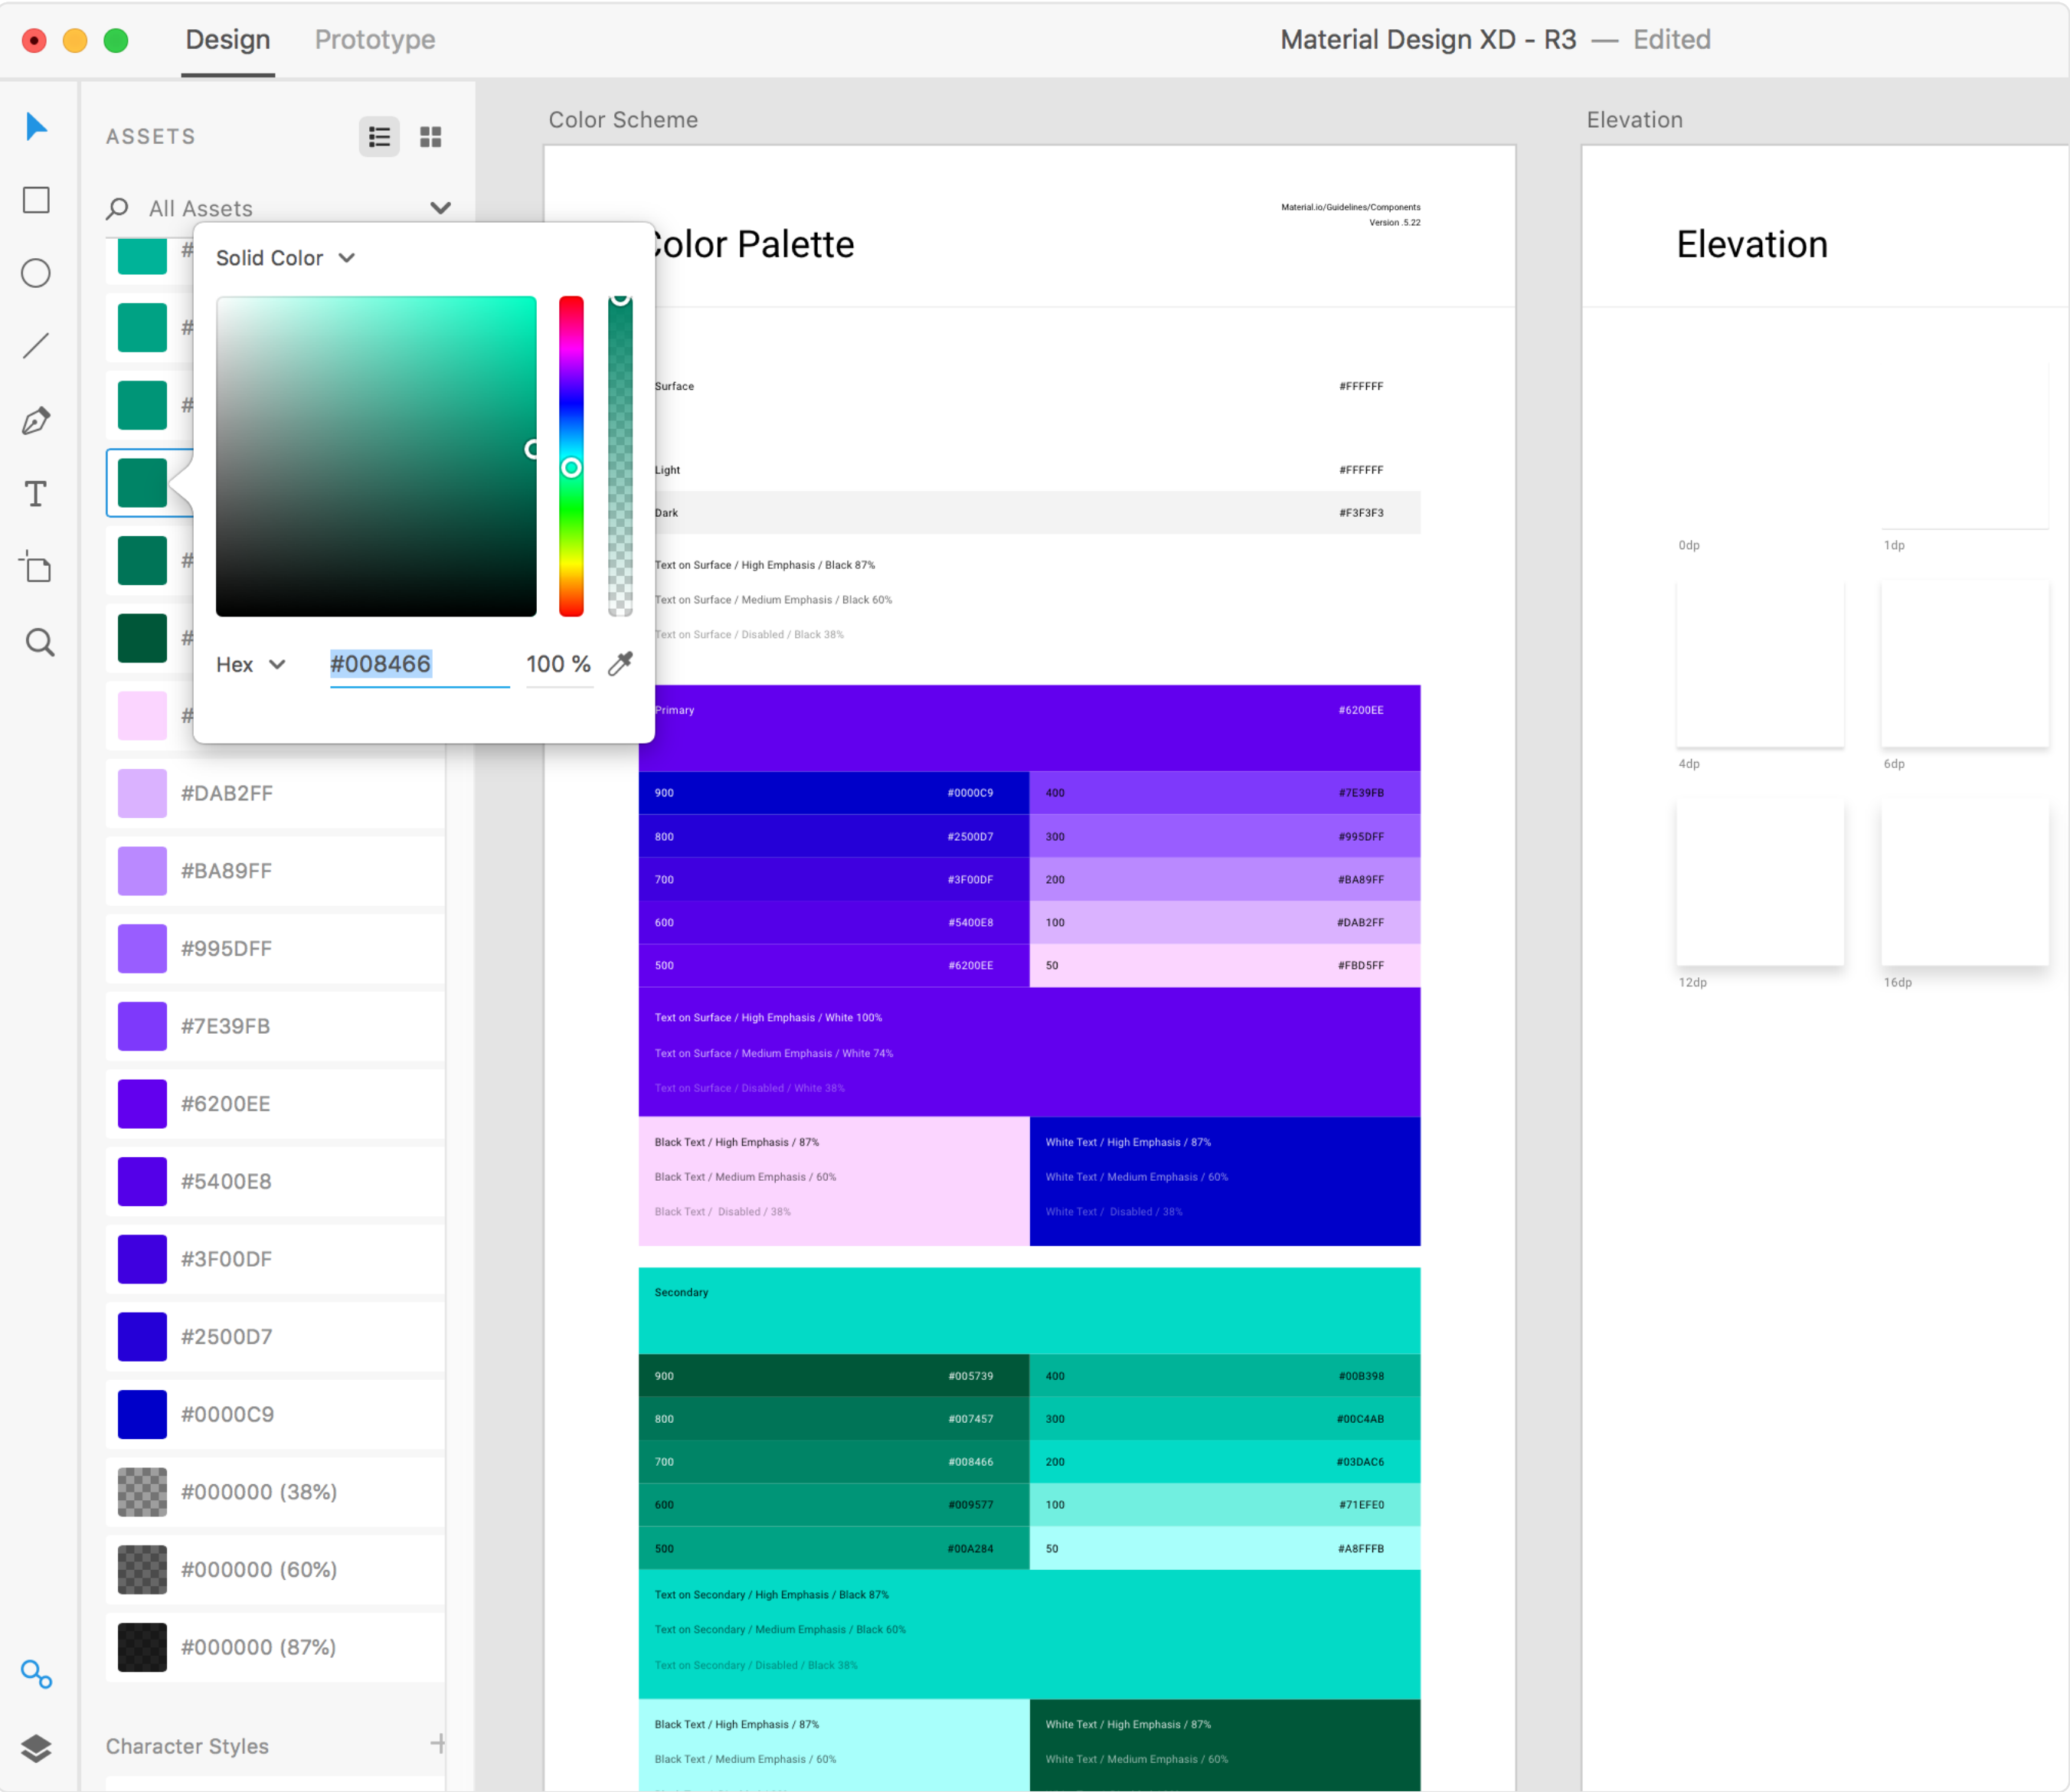

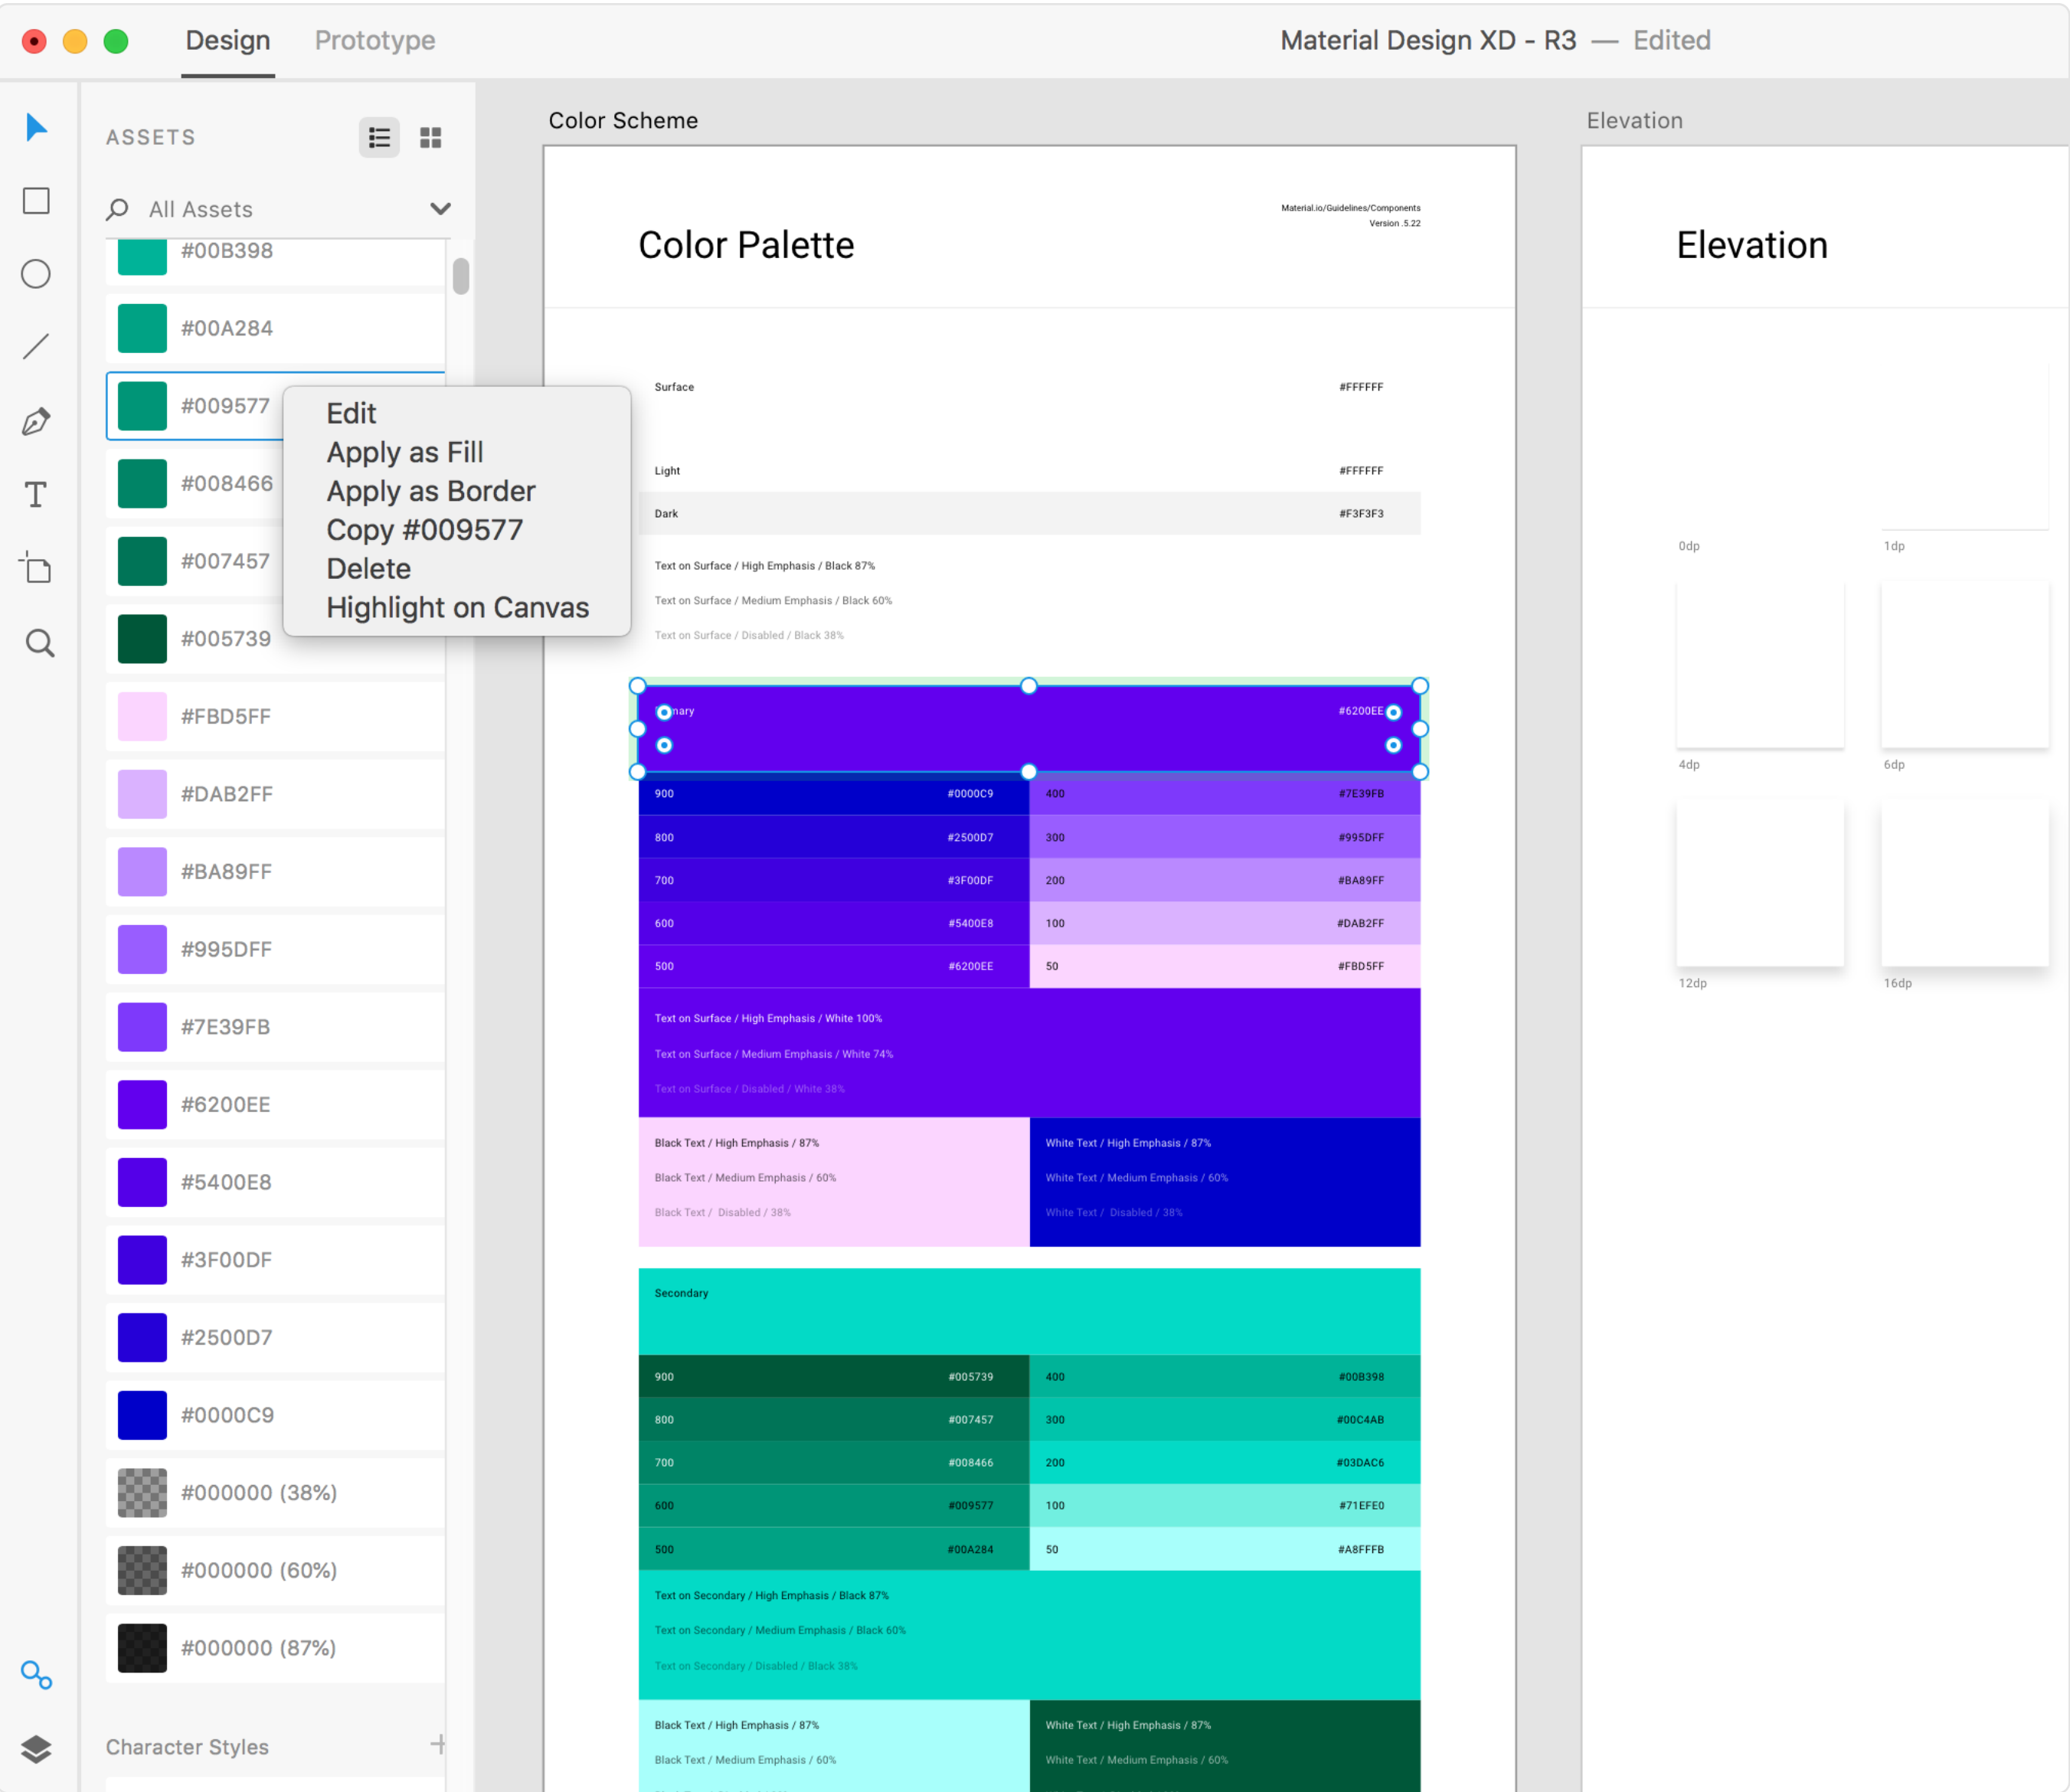

## Name/ Search/ Arrange/ Highlight Symbols, Colors & Character Styles:

Add Symbols, Colors and Character Style to the Assets panel by selecting the object> right click> add Symbol or add Character Style or add Color to the Assets panel. You can name Colors, Character Styles, and Symbols right in the Assets Panel. To easily access these named assets you can filter by type or

# Make Character Style and Color changes across multiple artboards:

Add Colors and Character Style to the Assets panel by selecting the object> right click> add Character Style or add Color to Assets. Rename them if required by accessing them through the Assets panel. Select the Character Style / Color in the Assets panel. Right click >edit and make the required changes. These changes will be reflected across all the instances in the document.

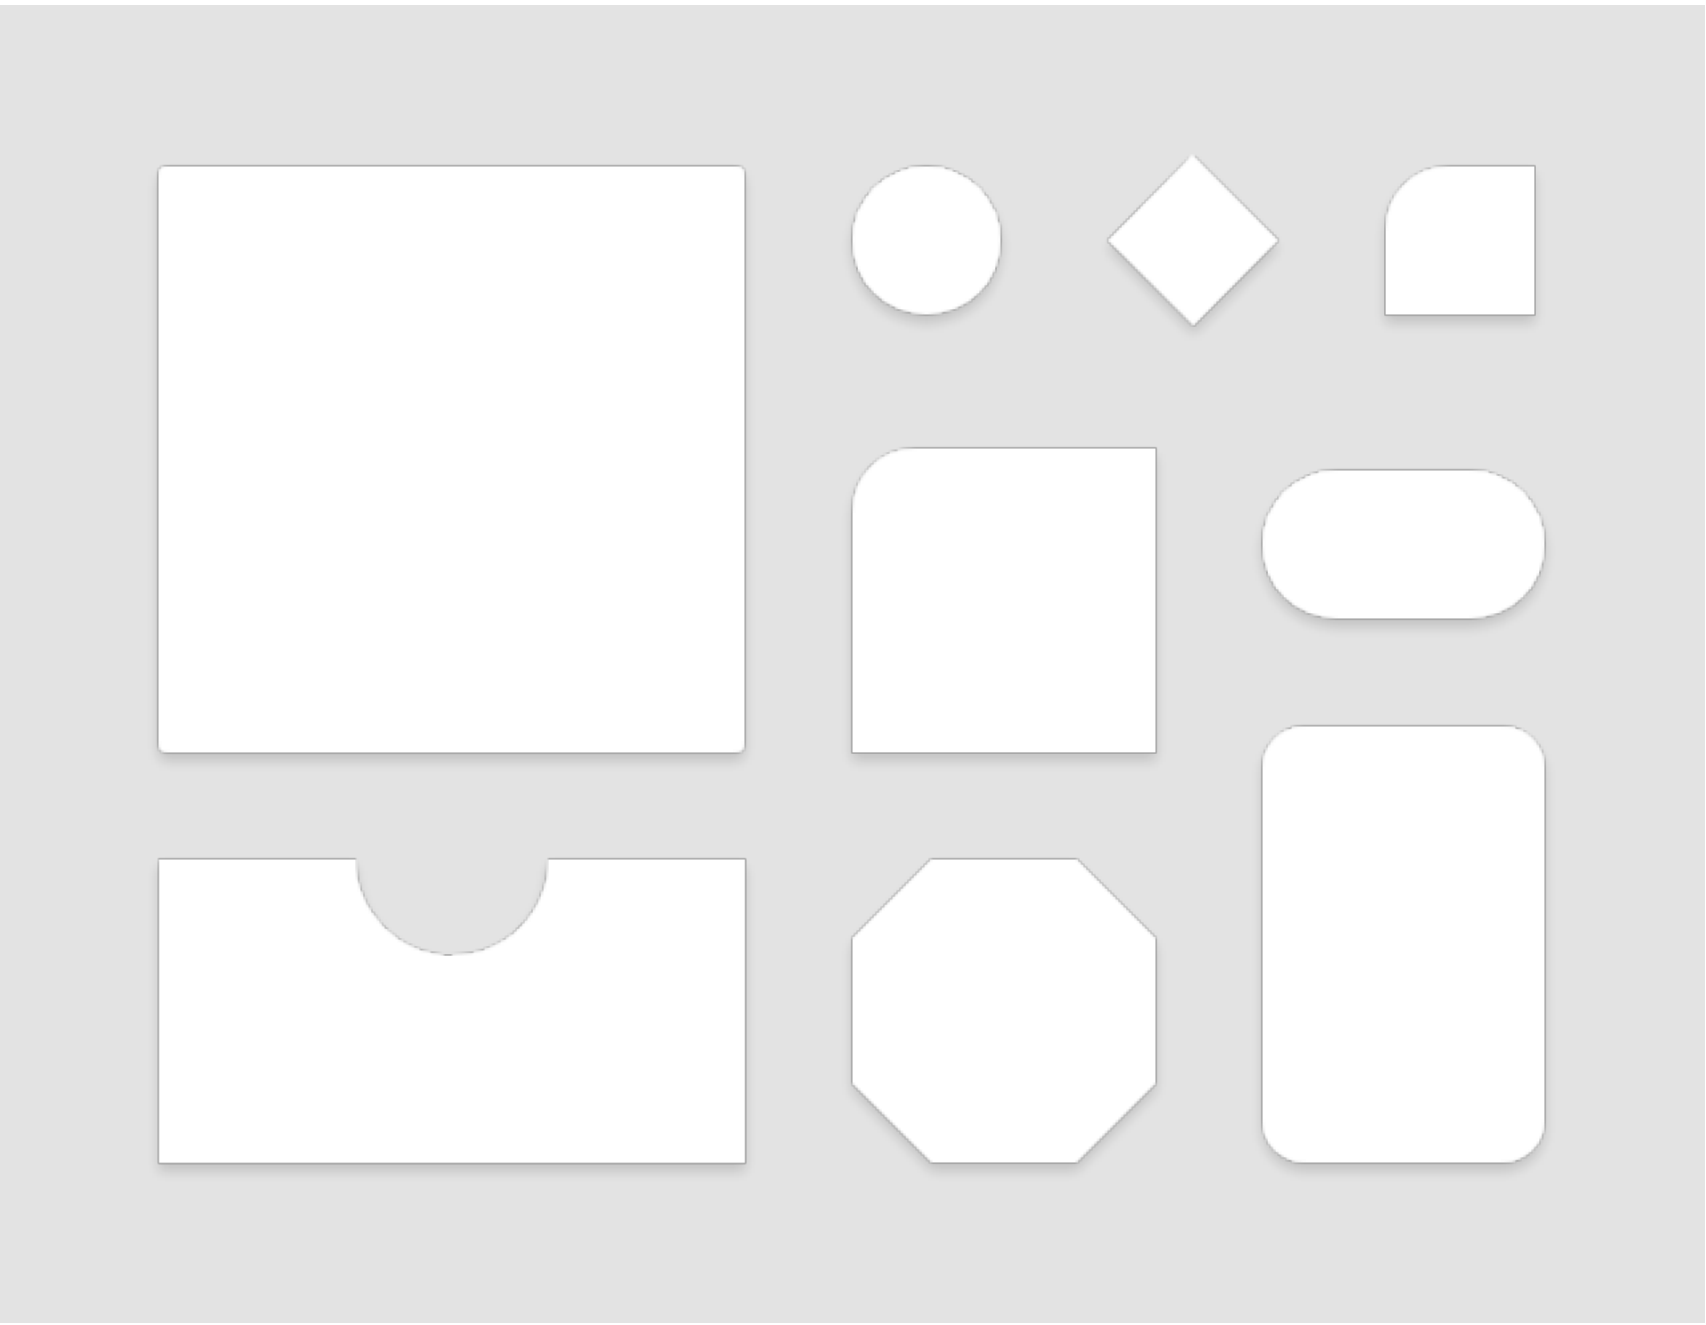

# Shapes

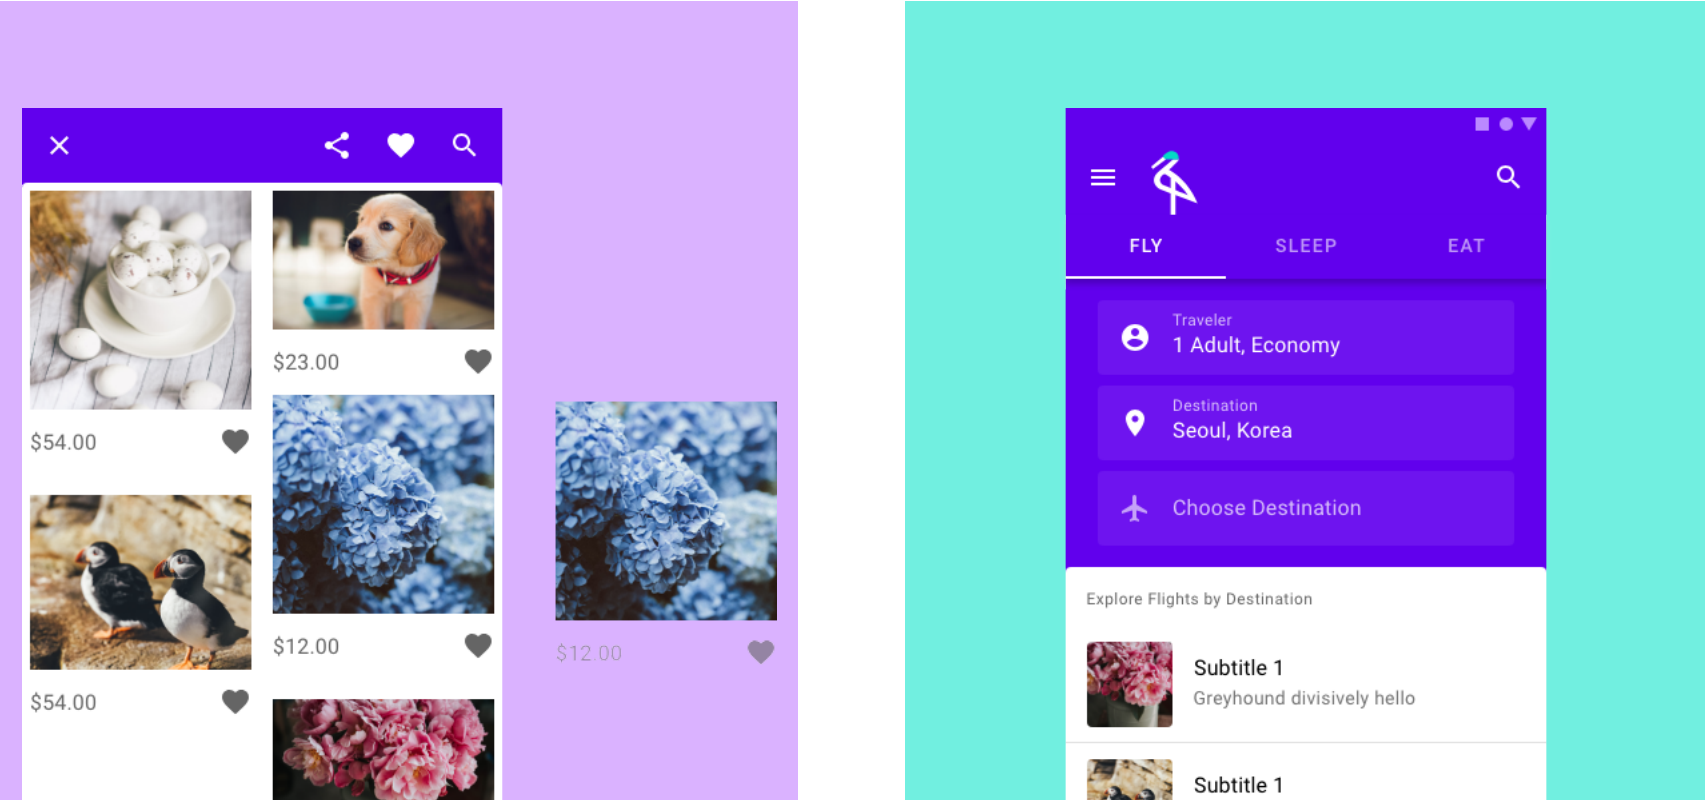

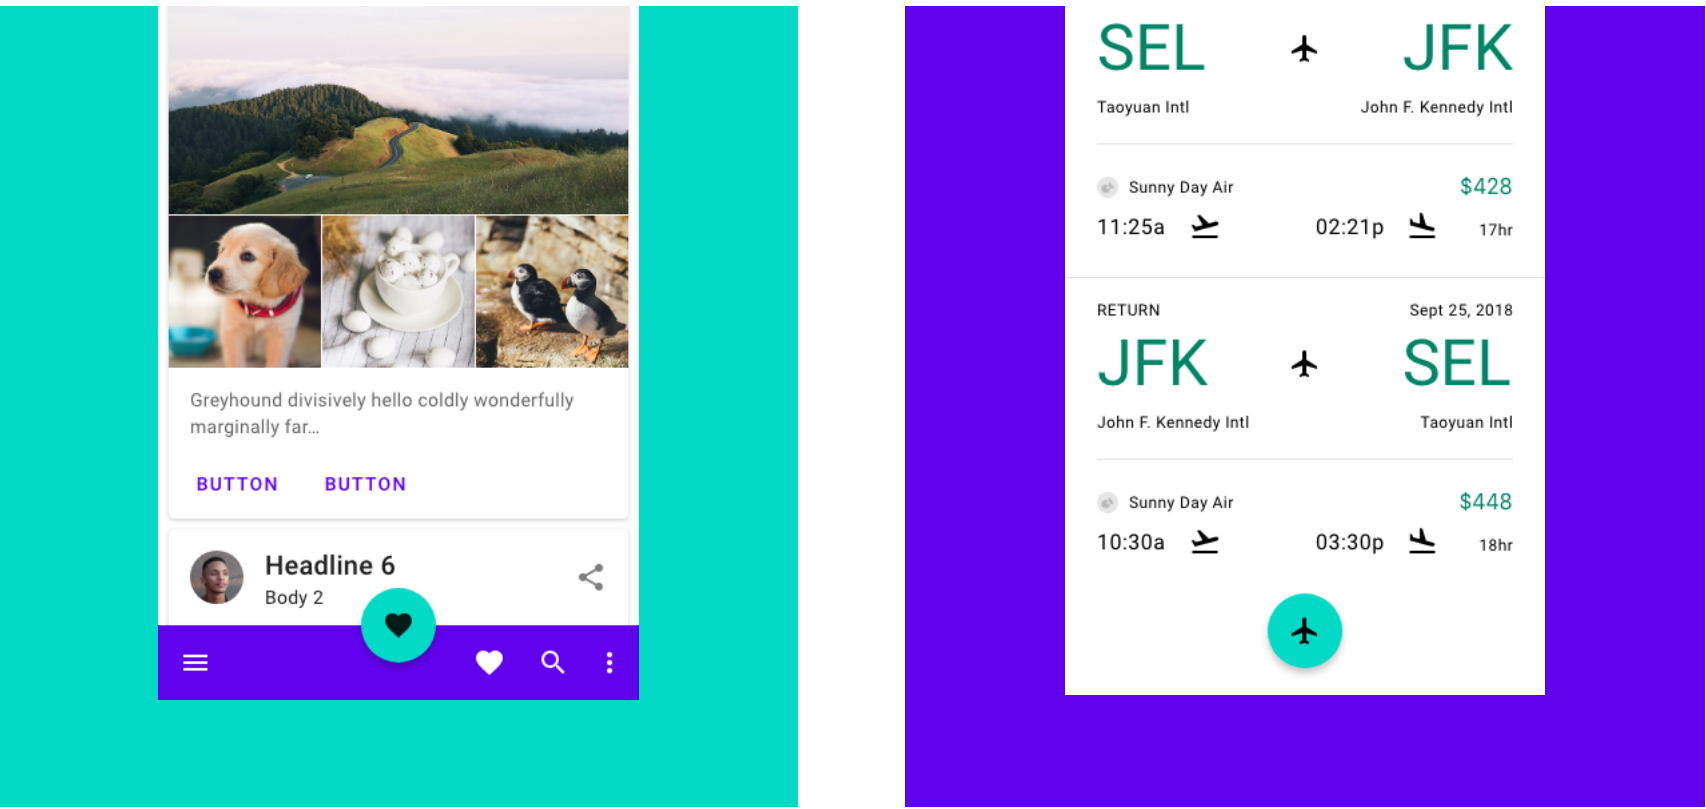

Material surfaces can be displayed in different shapes. Shapes direct attention, identify components, communicate state, and express brand. Material surfaces have a rectangular shape by default, with 4dp rounded corners. They have adjustable:

- Corner angles and curves
- Edge angles and curves
- The number of corners
- Shape changes, such as rounded or clipped corners, can be subtle or more significant.

Examples made in XD using a combination of corner radius and masks

Other examples from Material.io

# System Icons

By default this theme uses the Filled system icon set. Override any icon in this file for a different preset style – Rounded, Sharp, Outlined or Two-toned – by using Overrides in Sketch.

Download full icon sets with Theme Editor and select in the Sketch menu “File > Add as Library” or visit [Material.io/icons](https://material.io/icons)
